Reflection 11

I felt this week went very well. I know the coding topics and UML diagrams that I need to work on this week and next week. I have no idea what to do for the final journal report. I don't know how to make it creative but also show the things I have learned and how I have changed this semester. That will be a struggle for me.

That's a really good question. How ARE we supposed to make it creative? Have you heard of anything others have done in the past?

**Sarah Schmutz**

Yesterday 9:08 PM +1

I've heard of past students making videos, songs, poems, and art work for their journal. I don't really know how to apply one of those topics into my journal because I am not very good at

Discussion - Mar 2, 2015

Brother Tuckett, what is the date where we can no longer submit initial understandings? (Strongly disagree to a different level)

After Week 10

**Lehi Thomas** Mar 6, 2015  
What week are we on? I get confused with the lesson numbers not matching the week. Is this week 9?

**Richard Henke**  
Mar 6, 2015  
I'm not sure what week this is either.

**Troy Tuckett** Mar 6, 2015  
I believe we are in week 9.

Elevator Pitches - Jan 16, 2015

#ElevatorPitch

Here's my elevator pitch for an android app! There are a couple of apps that are already available that do something similar, but I want mine to be easy to use and pretty basic.  
Please let me know what you think. Thanks!

Wow very creative, I like it, I remember trying to write my own book in second grade so I think this would be a good app.

#AngularJS

Here is the angular page, it shows code examples of how it works if anyone is interested. At work we are using a .Net back end but it works with anything.

I have had this issue as well.

**Richard Henke** 12:34 PM

I finally figured it out and I posted a link in the comments to my GitHub repo if you want to see how it works:
